Passwords

Generate Random Password

With `pwgen` (generate 1 password, length 16, with a least a number and uppercase character)

```
pwgen -cns 16 1
```

Encrypt Password

With `openssl` (encrypt password from `password.txt` using SHA-512 and random salt)

```
openssl passwd -in password.txt -6
```

Paramter	Description
-salt *string*	use specified salt instead of random
-crypt	encrypt with *crypt* algorithm (default)
-1	encrypt with *MD5* algorithm
-5	encrypt with *SHA-256-crypt* algorithm
-6	encrypt with *SHA-512-crypt* algorithm
