VM / firewall (needs verification)

Description

This VM is for running VyOS to act as a firewall/router for the network. Originally this machine was running pfSense (which is excellent) but that is based on FreeBSD and I wanted a firewall/router based on Linux.

Configuration

Resources

Hostname	CPU	Memory
firewall	2 vCPU	512MB

Storage

Disk	Controller	Size	Purpose
vpool-zfs:vm-104-disk-0	ide0	1M	EFI

Networking

Interfaces

ID	Name	Bridge	IP Address
net0	n/a	vmbr0	(DHCP)

ID	Name	Bridge	IP Address
net1	n/a	vmbr1	10.0.1.1/21
